# OUR COMPANY RELIES ON **NATURAL MATERIALS** TO BUILD OUR BUSINESS, **JUST LIKE YOURS.**

Therefore it is only natural that we are interested in doing the right thing for the environment... and your business. That is why we developed an entire line of hardwood plywood that carries the familiar Forest Stewardship Council® (FSC®) mark. FSC is recognized and specified by architects and designers seeking wood products which contribute to credits in Living Building Challenge and LEED® which together exclusively call for this “gold” standard of forest certification programs.

Columbia also has your indoor air quality requirements covered with no-added formaldehyde FSC-certified constructions featuring our EPA award-winning PureBond® plywood assembly process.

# SECURING AND CONVERTING FSC FIBER INTO DECORATIVE HARDWOOD PLYWOOD PANELS IS ONLY HALF OF THE STORY

**Columbia Forest Products** has been **dedicated to supporting, growing and sustaining FSC certification in the U.S. and Canada** since its early introduction within North America. And that commitment — and the efforts behind it — remain steadfast today. Columbia has developed the **largest North American network of FSC chain of custody (COC) certified building products distributors**, which enables customers to readily purchase the FSC certified panel products they specify. Moreover, those COC distributors are trained in the material handling, use and application in green building programs such as LEED.<sup>®</sup> Columbia has also encountered a new demand driver for FSC as today's firms, who are cognizant of the Lacey Act amendment, seek FSC Chain-of-Custody certification as a component of a responsible due care approach for wood sourcing.

FOREST PRODUCTS

Columbia offers hardwood plywood as FSC Mix in thicknesses ranging from 5/32 to 1-1/4" for veneer cores and 1/2" and 3/4" on composite cores. And this FSC-certified plywood can also be manufactured **formaldehyde-free** by using **PureBond®**, Columbia's proprietary, soy-based, cost neutral hardwood plywood manufacturing innovation.

Through all of this, Columbia has created a significant opportunity for fabricators to differentiate their product offerings in the marketplace. With green building projects registering exponential growth each year, **FSC-certified plywood plays a key role** in positioning fabricators who wish to capitalize on this growth opportunity.

## FEATURES & BENEFITS

- FSC Mix wood may contribute to points within the U.S. **Green Building Council's (USGBC) Leadership in Energy & Environmental Design (LEED®)** high performance green building standards.
- FSC Mix wood can be quoted with **Columbia's exclusive PureBond technology for formaldehyde-free construction** in all core types.
- FSC Mix hardwood plywood products are offered in thicknesses ranging from 5/32" to 1-1/4" for veneer cores and 1/2" and 3/4" on composite cores.
- Columbia's well established network of COC distributors ensures **product availability** with manageable lead times.
- Columbia's **LEED AP®** can assist architects, specifiers, designers, fabricators and homeowners with **specification support for FSC-certified, no-added formaldehyde panels** in green building projects.
- **FSC® Mix** panel assemblies available at time of order placement.
